- Deepen Rider’s earth and climate scientists’ knowledge of the effects of racism on the participation and retention of black, brown, and indigenous people.
- Use the existing literature, expert opinion, and personal experiences to develop anti-racist policies and strategies.
- Share, discuss, and modify anti-racist policies and strategies within a dynamic community network and on a national stage.

We are committed to our pod’s objectives:

- Study from relevant literature, discuss and assess the racial justice, equity, and inclusivity of our department.
- Engage in discussions with other relevant units/groups at our institution to increase perspective and inclusion, and improve action plan items.
- Develop and propose to all members of the departments of geological, environmental and marine sciences and biology, behavioural neuroscience and health an anti-racism Action Plan with actions specific to issues in the departments including methods for measuring and reporting progress.
- Share our work with other units who seek to do similar work.
