URGE Resource Map for Cornell EAS Department

This is a draft Resource Map for Cornell Earth & Atmospheric Sciences (EAS) URGE pod at Cornell University. This was adapted from the "Sample Ph.D. Mentoring Plan" developed by Vashan Wright (Woods Hole Oceanographic Institution) and Karin Block (City College of New York and CUNY Graduate Center), License: CC BY-NC-SA 4.0. Some of these will be resources common to all and some will be questions for identifying specific resources based on needs/interests identified during initial meetings while implementing the mentoring plan.

The goal of this document is to connect students, faculty, and staff to helpful EAS Department, campus, and community resources. This is a working document that will be continually updated and added to after additional resources have been addressed.

XI. Lab Group Recommendations:

Building an equitable inclusive workplace in which all members feel valued requires expectations to be clearly communicated and regularly revisited. Some recommendations to adopt include:

● Create a code-of-conduct that addresses inclusivity and diversity, mental health, publications or outputs, social media use, working hours, and vacation
● Outline expectations for taking vacation (e.g., 3 weeks) and for reasonable work hours (e.g., 40-50 hrs/wk; be explicit!)
● Create a communication plan and expectations, e.g. how do members communicate with each other and what times are appropriate
● Establish a plan for working with new hires/students for connecting them with resources that will be of most use to them, e.g. schedule for initial call(s) and/or meeting(s) to identify needs/interests
● Establish individual/group meeting expectations (interval/frequency, journal articles, presentations, socializing, time management, reviewing manuscripts, revising manuscripts/dealing with rejection, careers, current events, media requests)
● What skills or experiences are required for their (course)work? e.g., driving, hiking/outdoors activities, compass/GPS navigation, swimming/SCUBA, operating power tools, first aid, etc.
  ○ How will you support your team in building these skills?
● Conference and workshop participation (how often and who pays for it?)
  ○ Be explicit about opportunities for this type of participation and at what point they will be expected to attend conferences
  ○ Conference Resources
● Be open to considering proposed workshops/conferences, especially for groups like SACNAS, NABG, AISES, GeoLatinas, Institute on Teaching and Mentoring, and others
● Evaluations: rubric, frequency for advisor/committee evaluations, encourage
self-evaluation (reflection) and review long term goals and how to achieve them
